

Example of content of a report on the Polish environmental protection market

Table of contents:

1. Introduction
 - 1.1. Subject of elaboration
 - 1.2. Goal and range of elaboration

- 2. WASTE MANAGEMENT**
 - 2.1. Current state
 - 2.2. Legal requirements concerning technologies, installations and machines
 - 2.2.1. Adjustment of Polish regulations to the EU requirements
 - 2.3. Demand for technologies, installations and machines (National Waste Management Plan and Voivodship Plans)
 - 2.4. Norms and certificates – requirements for products of foreign origin introduced to the Polish market
 - 2.5. Demands and priorities till the year 2006 and in the long term for the years 2007 - 2013
 - 2.5.1. Procedures, formal and legal conditions for investments
 - 2.5.2. Potential partners and ways to get into business with them
 - 2.5.3. List of planned investments
 - 2.6. Leading suppliers of technologies, installations and machines from Poland and from abroad (situation on the Polish market)

- 3. WATER AND WASTE WATER MANAGEMENT**
 - 3.1. Current state
 - 3.2. Legal requirements concerning technologies, installations and machines
 - 3.2.1. Adjustment of Polish regulations to the EU requirements
 - 3.3. Demand for technologies, installations and machines (National Communal Wastewater Treatment Plan)
 - 3.4. Norms and certificates – requirements for products of foreign origin introduced to the Polish market
 - 3.5. Demands and priorities till the year 2006 and in the long term for the years 2007-2015
 - 3.5.1. Procedures, formal and legal conditions for investments
 - 3.5.2. Potential partners and ways to get into business with them
 - 3.5.3. List of planned investments
 - 3.6. Leading suppliers of technologies, installations and machines from Poland and from abroad (situation on the Polish market)

4. RENEWABLE ENERGY

- 4.1. Current state
- 4.2. Legal requirements concerning technologies, installations and machines
 - 4.2.1. Adjustment of Polish regulations to the EU requirements
- 4.3. Demand for technologies, installations and machines
- 4.4. Norms and certificates – requirements for products of foreign origin
- 4.5. Demands and priorities till the year 2008 and in the long term for the years 2009-2025 (Strategy of development of renewable energy sector, Polish Energy Policy)
 - 4.5.1. Procedures, formal and legal conditions for investments
 - 4.5.2. Potential partners and ways to get into business with them
 - 4.5.3 Directions of investments' development
- 4.6. Leading suppliers of technologies, installations and machines from Poland and from abroad (situation on the Polish market)

5. AIR PROTECTION

- 5.1 Current state
- 5.2 Legal requirements concerning applied technologies, installations and machines
 - 5.2.1 Adjustment of Polish regulations to the EU requirements and international conventions
- 5.3. Demand for technologies, installations and machines
- 5.4 Norms and certificates – requirements for products of foreign origin
- 5.5 Demands and priorities till the year 2010 and in the long term for the years 2011-2025 (national documents/strategies)
- 5.6 Procedures, formal and legal conditions for investments
- 5.7 Potential partners and ways to get into business with them
- 5.8 Directions of investments' development
- 5.9 Leading suppliers of technologies, installations and machines from Poland and from abroad (situation on the Polish market)

6. FINANCING OF PROJECTS

- 6.1. Non commercial sources of investments' financing
 - 6.1.1 System of environmental protection funds
 - 6.1.1 Application procedures to the funds
- 6.2. Commercial sources of financing of pro-ecological investments
- 6.3 Polish system of public contracts
